This Book Is Safari Enabled

The Safari® Enabled icon on the cover of your favorite technology book means the book is available through Safari Bookshelf. When you buy this book, you get free access to the online edition for 45 days.

Safari Bookshelf is an electronic reference library that lets you easily search thousands of technical books, find code samples, download chapters, and access technical information whenever and wherever you need it.

To gain 45-day Safari Enabled access to this book:

- Go to <http://www.sampublishing.com/safarienabled>
- Complete the brief registration form
- Enter the coupon code NEG-X2YF-A1RB-FTFV-9349

If you have difficulty registering on Safari Bookshelf or accessing the online edition, please email customer-service@safaribooksonline.com.

Contents at a Glance

Introduction	1
Part I Installation and Configuration	
1 Introducing Fedora	13
2 Preparing to Install Fedora	27
3 Installing Fedora	53
4 Post-Installation Configuration	83
5 First Steps with Fedora	119
Part II Desktop Fedora	
6 The X Window System	165
7 Managing Software	191
8 On the Internet: Surfing the Web, Writing Email, and Reading the News	209
9 Productivity Applications	239
10 Multimedia Applications	261
11 Graphics Manipulation	285
12 Printing with Fedora	299
13 Games	313
Part III System Administration	
14 Managing Users	325
15 Automating Tasks	351
16 System Resources	413
17 Backing Up, Restoring, and Recovery	423
18 Network Connectivity	455
19 Remote Access with SSH and Telnet	507
20 Xen	515
Part IV Fedora As a Server	
21 Apache Web Server Management	523
22 Administering Database Services	567
23 File and Print	593
24 Remote File Serving with FTP	625

25	Handling Electronic Mail	669
26	Setting Up a Proxy Server	691
27	Managing DNS	701
28	LDAP	741
29	News Servers	751
Part V Programming Linux		
30	Using Perl	767
31	Working with Python	789
32	Writing PHP Scripts	809
33	C/C++ Programming Tools for Fedora	843
34	Mono	859
Part VI Fedora Housekeeping		
35	Securing Your Machines	873
36	Performance Tuning	885
37	Command Line Masterclass	899
38	Advanced yum	925
39	Managing the File System	935
40	Kernel and Module Management	973
Part VII Appendix		
A	Fedora and Linux Internet Resources	999
	Index	1011

Table of Contents

Introduction	1
Part I Installation and Configuration	
1 Introducing Fedora	13
What Is Fedora?	15
Inside Fedora Core	15
Features of the Fedora Install	18
Fedora File System Features	18
Fedora for Business	20
Fedora in Your Home	21
64-Bit Fedora	22
Fedora on the PPC Platform	22
Fedora on Dual-Core Machines	23
Getting the Most from Fedora and Linux Documentation	23
Fedora Developers and Documentation	25
Reference	26
2 Preparing to Install Fedora	27
Planning Your Fedora Deployment	28
Business Considerations	28
System Considerations	30
User Considerations	31
A Predeployment Planning Checklist	32
Planning the Installation	33
Hardware Requirements	33
Meeting the Minimum Fedora Core Hardware Requirements	34
Using Legacy Hardware	34
Planning for Hard Drive Storage for Your Fedora	
Installation Class	35
Checking Hardware Compatibility	36
Preparing for Potential Hardware Problems	37
Preparing and Using a Hardware Inventory	40
Preparing for the Install Process	43
Preparing to Install from a CD-ROM	45

Partitioning Before and During Installation	45
Choosing a Partitioning Scheme	47
Hosting Parts of the Linux File System on Separate Partitions	47
Using Fedora's kickstart Installation Method	48
Reference	51
3 Installing Fedora	53
Before You Begin the Installation	53
Research Your Hardware Specifications	53
Choose an Installation Type	54
Choose Software Installation Options	54
Planning Partition Strategies	55
The Boot Loader	56
Choosing How to Install Fedora	57
Installing from CD or DVD	57
Installing Using a Network	58
Step-by-Step Installation	59
Starting the Install	60
Partitioning Your Hard Drive	66
Choosing, Configuring, and Installing the Boot Loader	68
Network Configuration	70
Setting the Time Zone	71
Creating a Root Password and User Accounts	73
Software Selection and Installation	74
Finishing the Install	76
firstboot Configuration	78
Logging In and Shutting Down	81
Reference	82
4 Post-Installation Configuration	83
Troubleshooting Post-Installation Configuration Problems	83
Your Hardware and Kudzu	84
Pointer and Keyboard Configuration	86
Configuring Keyboards with Linux	86
Configuring Pointing Devices in Fedora	90
Configuring Display Graphics	94
Configuring Sound Devices	96
Detecting and Configuring a Modem	97
Configuring a Serial-Port Modem	98
Configuring a Fax Modem	101
Configuring minicom for Modem Use	101
Configuring WinModems for Laptops	102

Configuring Power Management in Fedora	102
Resetting the Date and Time	105
Using the date Command	105
Using the hwclock Command	105
Using the system-config-date Client	106
Managing PCMCIA	107
Using PCMCIA	107
Controlling PCMCIA Service	109
Configuring and Using CD, DVD, and CD-RW Drives	109
Checking Drive Assignment	110
Initializing FireWire CD Drives	111
Configuring Wireless Networks	114
Reference	117
5 First Steps with Fedora	119
Working with the Linux File System	120
Viewing the Linux File System	121
Use Essential Commands from the /bin and /sbin Directories	123
Store the Booted Kernel and View Stored Devices in the /boot and /dev Directories	124
Use and Edit Files in the /etc Directory	124
Protect the Contents of User Directories—/home	129
Use the Contents of the /proc Directory to Interact with the Kernel	129
Work with Shared Data in the /usr Directory	131
Temporary File Storage in the /tmp Directory	131
Access Variable Data Files in the /var Directory	131
Logging In to and Working with Linux	131
Text-Based Console Login	132
Working with Virtual Consoles	132
Using Simple Keyboard and Mouse Techniques in a Linux Console Session	133
Logging Out	135
Logging In and Out from a Remote Computer	135
Changing Your User Information	137
Reading Documentation	138
Using Man Pages	139
Finding and Reading Software Package Documentation	139
Using the Shell	140
Using Environment Variables	142
Navigating and Searching with the Shell	144

- Managing Files with the Shell 145
- Compressing and Decompressing Files Through the Shell 146
- Using the Text Editors 147
 - Working with vi 148
 - Working with emacs 149
- Working with Permissions 151
 - Assigning Permissions 152
 - Directory Permissions 153
 - Understanding Set User ID and Set Group ID Permissions 155
- Working As Root 156
 - Creating Users 157
 - Deleting Users 158
 - Shutting Down the System 158
 - Rebooting the System 159
- Reference 160

Part II Desktop Fedora

- 6 The X Window System 165**
 - Basic X Concepts 166
 - Using X 167
 - Elements of the xorg.conf File 168
 - Configuring X 173
 - Starting X 177
 - Using a Display Manager 177
 - Starting X from the Console by Using startx 180
 - Selecting and Using Window Managers 181
 - Using Fedora’s switchdesk 182
 - The Tab Window Manager 183
 - The Motif Window Manager 184
 - AIGLX—Eye Candy for the Masses 185
 - The GNOME and KDE Desktop Environments 186
 - GNOME: The GNU Network Object Model Environment 186
 - KDE: The K Desktop Environment 188
 - Reference 189
- 7 Managing Software 191**
 - Using RPM for Software Management 191
 - Command-Line and Graphical RPM Clients 193
 - Using rpm on the Command Line 195
 - Package Organization with RPM 197
 - Extracting a Single File from an RPM File 198
 - Using pirut for Software Management 198

Alternatives for Software Management	200
yum	201
pup	202
Compiling Software from Source	203
Building rpms from src.rpm Files	203
Working with Source RPM Files	204
Compile from Source Tarballs	206
Reference	208
8 On the Internet: Surfing the Web, Writing Email, and Reading the News	209
Choosing a Web Browser	209
Mozilla Firefox	210
The Mozilla Suite	211
Epiphany	212

Part III	System Administration	
14	Managing Users	325
	User Accounts	325
	User IDs and Group IDs	327
	File Permissions	327
	Managing Groups	328
	Group Management Tools	330
	Managing Users	332
	User Management Tools	332
	Adding New Users	334
	Monitoring User Activity on the System	335
	Managing Passwords	336
	System Password Policy	336
	The Password File	336
	Shadow Passwords	338
	Managing Password Security for Users	340
	Changing Passwords in a Batch	341

Granting System Administrator Privileges to Regular Users	341
Temporarily Changing User Identity with the <code>su</code> Command	341
Granting Root Privileges on Occasion—The <code>sudo</code> Command	343
Control Via Restricted Shells	346
The User Login Process	346
Disk Quotas	348
Implementing Quotas	348
Manually Configuring Quotas	349
Reference	350
15 Automating Tasks	351
Running Services at Bootup	352
Beginning the Boot Loading Process	352
Loading the Linux Kernel	353
System Services and Runlevels	354
Runlevel Definitions	355
Booting into the Default Runlevel	356
Booting to a Nondefault Runlevel with GRUB	358
Understanding <code>init</code> Scripts and the Final Stage of Initialization	359
Controlling Services at Boot with Administrative Tools	360
Running Services Through <code>xinetd</code>	363
Changing Runlevels	364
Troubleshooting Runlevel Problems	365
Starting and Stopping Services Manually	366
Scheduling Tasks	367
Using <code>at</code> and <code>batch</code> to Schedule Tasks for Later	367
Using <code>cron</code> to Run Jobs Repeatedly	369
Basic Shell Control	372
The Shell Command Line	373
Shell Pattern-Matching Support	374
Redirecting Input and Output	375
Piping Data	376
Background Processing	377
Writing and Executing a Shell Script	377
Running the New Shell Program	379
Storing Shell Scripts for Systemwide Access	380
Interpreting Shell Scripts Through Specific Shells	380
Using Variables in Shell Scripts	382
Assigning a Value to a Variable	382
Accessing Variable Values	383
Positional Parameters	383

A Simple Example of a Positional Parameter	383
Using Positional Parameters to Access and Retrieve Variables from the Command Line	384
Using a Simple Script to Automate Tasks	384
Built-in Variables	387
Special Characters	387
Use Double Quotes to Resolve Variables in Strings with Embedded Spaces	388
Using Single Quotes to Maintain Unexpanded Variables	389
Using the Backslash As an Escape Character	390
Using the Backtick to Replace a String with Output	390
Comparison of Expressions in <code>pdksh</code> and <code>bash</code>	390
Comparing Expressions with <code>tcsh</code>	396
The <code>for</code> Statement	400
The <code>while</code> Statement	401
The <code>until</code> Statement	403
The <code>repeat</code> Statement (<code>tcsh</code>)	404
The <code>select</code> Statement (<code>pdksh</code>)	404
The <code>shift</code> Statement	405
The <code>if</code> Statement	405
The <code>case</code> Statement	407
The <code>break</code> and <code>exit</code> Statements	408
Using Functions in Shell Scripts	409
Reference	410
16 System Resources	413
System-Monitoring Tools	413
Console-Based Monitoring	413
Using the <code>kill</code> Command to Control Processes	415
Using Priority Scheduling and Control	416
Displaying Free and Used Memory with <code>free</code>	418
Disk Quotas	418
Graphical Process- and System Management Tools	419
KDE Process- and System-Monitoring Tools	422
Reference	422
17 Backing Up, Restoring, and Recovery	423
Choosing a Backup Strategy	423
Why Data Loss Occurs	424
Assessing Your Backup Needs and Resources	425
Evaluating Backup Strategies	427
Making the Choice	429

Choosing Backup Hardware and Media	430
Removable Storage Media	430
Network Storage	431
Tape Drive Backup	432
Using Backup Software	432
tar: The Most Basic Backup Tool	433
The GNOME File Roller	435
The KDE Archiving Tools (KDE ark and kdat)	435
Using the dd Command for Archiving	437
Using the Amanda Backup Application	438
Alternative Backup Software	438
